Chad Koslovsky

Infrastructure leadership | Clear ownership, dependable systems

Milliken, Colorado · chad@koslovsky.xyz

Senior Manager IT Infrastructure | Trexon

01 PROFILE

Infrastructure and systems leader combining NOC responsibility, multiyear production operations and direct client ownership. Led engineering through organizational change, ran SOC audits and modernized servers, networks and access while keeping support, recovery and business costs in view.

02 EXPERIENCE

Founder / Product Engineer / Systems Lead · Technomancy IT LLC | 2015-Present

Own client IT from infrastructure design through deployment and direct support. Coordinate specialist contributions and connect technical decisions with business workflows and operating costs.

Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020

Led the NOC and infrastructure operations through a multiyear tenure and company purchase; later held sole systems-engineering responsibility for about a year. Modernized workloads and server/firewall infrastructure, and ran SOC 1/SOC 2 audits.

Systems / Software Engineer · Office Evolution | 2014-2015

Connected onboarding, provisioning, CRM and service operations across locations through shared applications. Worked with the CEO and CIO to make cross-department handoffs explicit.

Network & Systems Engineer · PlumChoice / Everon | 2012-2014

Engineered networks, systems and endpoints for managed-service clients. Built diagnostic tooling, provided on-call coverage and worked directly with business owners and end users.

Infrastructure and Systems Focal · IBM | 2010-2012

Supported shared enterprise infrastructure and coordinated changes across application, infrastructure and vendor teams. Automated audit/backup workflows and managed virtualization labs.

03 SELECTED WORK

Excell Services | Legacy infrastructure and branch connectivity · Technomancy IT client, Wray, Colorado

Replaced or rebuilt legacy servers and employee computers, upgraded networks, and connected a satellite location with VPN, Windows Server and Active Directory.

Investigated wasted network costs and secured a one-time $15,000 CenturyLink refund.

Technomancy | Repeatable delivery and recovery · Own technical practice and operating platform

Built deployment tooling around versioned images, migrations, health checks and deployment records, plus a backup restore-verification workflow using a disposable PostgreSQL instance.

04 CAPABILITIES

Infrastructure leadership, NOC coverage and incident escalation · Networks, VPNs, Windows Server, Active Directory and Microsoft 365 · Azure/AWS, virtualization and Docker/Kubernetes modernization · Recovery verification, operating procedures and SOC 1/SOC 2 audits · Vendor troubleshooting, client communication and technical cost review
